* An engine with a leaking *Charge Air Cooler* will waste fuel. Dura-Lite's calculation of the amount of fuel your engine is wasting is approximately what is shown above. The calculations are only approximate amounts based on a formula, using information from customer experiences with our products. Those experiences may be different from yours. The amount you save may be more or less than what is shown, due to other factors not reflected in the calculations. Dura-Lite™ does not warrant the accuracy of the calculations.
